

I am vehemently opposed to any interference to the Indiana Do Not Call List by the banking industry or any industry for that matter.

This is a matter of State's Rights and personal Civil Rights. If I have a need for banking services, I know where to go. If banks wish to improve there revenue, they need to improve the quality of their existing services, not create further scams as they have done in the past such as inactivity fees, fees for coin counting for deposits, fees for making deposits, etc.
